

Assessment & Complementary Services for the Oil & Gas Sector

Muvoil
Consulting

Understanding
the Oil & Gas
industry in Mexico

About Muvoil Consulting

Founded in 2018 by a versatile group of professionals in the Oil & Gas industry who offer solutions in the legal, fiscal, economic, social, technical and environmental realms.

Part of our team designed Mexico's 2013 energy model and have remained active in the sector through its implementation.

Reasons to Work with us.

Our multidisciplinary local and international team includes Economists, Engineers, Geologists, Lawyers, and Sociologists with broad experience in the private and public sector.

We design customized strategic solutions strengthened by our broad knowledge about the business, its legal framework and regulator's decision-making processes.

Assessment and Verification services

At Muvoil, our commitment is to provide comprehensive and strategic solutions to optimize the operations of your project in the Oil & Gas industry:

Local Content Obligations

At Muvoil, we provide a wide variety of services for complying with National Content obligations: from advice on the development of your Training and Technology Transfer Programs, to prompt support prior to and during a cabinet verification, in which you will have personalized advice for all interactions with both the authority and your suppliers.

Our team of professionals assess the Costs to ensure that they are part of a Plan approved, and therefore, they are considered as Recoverable.

We also performed an exhaustive verification of the Costs recorded by Contractors and their correspondence with the Plans, Working Programs and Budgets approved.

Moreover, to comply with all fiscal requirements, we take care of classifying and correctly associating the invoices in the SIPAC.

Recoverable Cost

Assistance during SCHP's verifications

We accompany Contractors throughout the process of an audit requested by the Treasury and if the authority does not recognize certain costs as Recoverable, we advise you on the actions to be implemented to resolve the discrepancies.

COMPLEMENTARY SERVICES

Strategic Litigation

We advise and design legal strategies for Administrative resources; Mercantile, civil & agrarian litigation; Commercial arbitration; Amparo trials; Constitutional controversies, and Unconstitutional actions.

We serve as your voice before the competent authority to express concerns about draft regulations and thus be active participants in their updating through direct feedback from the industry.

Liaison

Regulatory Monitor

We carry out constant assessments of regulatory impact to keep your E&P contracts up to date. We make sure you have timely and informative analyses in the face of constant updates to the legal framework.

We provide personalized workshops for your company, designed by our versatile group of professionals in the O&G Industry.

Tailored Workshops

Political Analysis

We provide both political analysis and political communication strategies with an ample understanding of the political concerns that an Oil & Gas enterprise must consider while designing each deal or project to be developed in Mexico.

Energy projects are in constant evolution,
we can add our knowledge and experience
to adapt your **operational and commercial**
objectives to the new vision
of the **Mexican energy sector.**

Schedule a meeting with our experts.
